Professional Profile

Advanced student of the Higher Technical Degree in Software Development, with over 9 years of experience as an administrative assistant at the Rosario Bus Terminal. My background has strengthened my skills in data management, organization, customer service, and problem-solving — competencies I now apply in my development as a programmer.

I am passionate about designing **interactive and intuitive interfaces** and I am seeking to transition into the IT sector, bringing my ability to create user-oriented technological solutions.

Work Experience

Administrative Assistant – Rosario Bus Terminal *(July 2016 – Present)*

- Management and control of administrative documentation.
- Organization of information and records in digital systems.
- Customer service and resolution of inquiries from users and transport companies.
- Teamwork and coordination with different departments to optimize processes.
- Development of key skills in real-time problem solving and direct client interaction.

Featured Projects

■ TRRO (Tránsito Rosario)

Interactive web platform created as my first academic project in the Higher Technical

Degree in Software Development.

Features: route search, favorites saving, report generation, alternative routes, and dynamic map.

Technologies: Node.js, React, SQL, JSON. Includes login/registration system and interface design focused on user experience (UX).

■ Alterna Servicios Eléctricos

Professional responsive website built with HTML5, CSS3, and JavaScript under MVC architecture.

Features: interactive gallery, form validation, direct contact links, and basic SEO.

Published on GitHub Pages.
